Introduced exception tracking (Sentry)

Influenced emotional climate in the team during a burnout by initiating feedback

Documented essential procedures, CI and automation

SUMMARY

I prefer focusing on identifying the pain points and providing the remedy.

All my 17 years in the industry, including 7 years of freelance and startups, contributed to my confidence in that it's all about people, not technologies and methodologies. Naturally, this goes beyond the border of professional field becoming the art of life, which is about development through relationship and team play.

SKILLS

Infrastructure

Ansible, SaltStack, Puppet, AWS, Docker, Kubernetes, Jenkins, GitLab, Grafana

Python

CLI, Web, Ansible, SaltStack

Shell

Tools, Data Processing
